BREW THE PERFECT CUP

NEWCO 

SMART CUP

There is an alternative choice for one-cup-at-a-time brewing. Brewing PODs offers a great range of choices in the quest for the perfect cup.

How To Brew

Select The Type
Of Coffee Or Tea
You Would Like

Open The Holder,
Place The POD Inside,
Close.

Insert The Holder

SMART CUP brewing system has been designed to allow for different brew settings for each kind of coffee or tea. Since all products are brewed the same way, the brew time greatly affects the taste of the drink. The shorter the brew time the milder the beverage. You have the choice once you select the type of POD to select the strength. The individual POD holder, with its sensor technology, alerts the brewer to use the correct brew recipe for your beverage.

SMART CUP's brewing system offers the user three different strength selections (mild, classic, & dark) based upon brew time and cup volume to produce three distinct taste profiles for each kind of coffee or tea pod brewed. The **SMART CUP** brewing system remembers the unique **BREW RECIPIES** for up to 15 different pod holders.

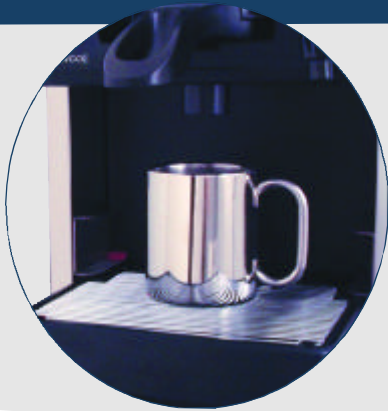

SMART CUP Sensor Technology

Knows What You Want To Brew

Ergonomically designed holder is a highly engineered brew chamber that infuses the POD at the ideal temperature and pressure to produce the perfect cup. "Savor the Flavor"™ for coffee & tea drinks.

Place Cup On Drip Tray

Select Strength
